SUMMER PROGRAM 2010

MUSICAL DRAMA & SET DESIGN

The Boy Friend

June 21–July 9 (3 week class) Ages 7 and up

The Boy Friend is a musical by Sandy Wilson. Set in the carefree world of the French Riviera in the Roaring 1920s, *The Boy Friend* is a parody of many 1920s shows. The main role is the character of Polly Browne, a rich heiress, who attends a finishing school for wealthy girls on the French Riviera. Polly is the only girl at the school that does not have a boyfriend because her father, Percival, thinks that any boy interested in his daughter is obviously only concerned with her inheritance. Just before the Carnival Ball, Polly encounters an attractive messenger boy named Tony. She soon convinces him that she is merely a poor secretary. They fall for each other, but then Tony runs off, and Polly sadly suspects that he must be a thief. But Tony shows up at the Ball and reveals that he is quite rich and truly in love with Polly. She then reveals her true identity and the two are able to be happy together.

ART & SCULPTURE

Kids and Clay Pottery Studio

July 19–23 Ages 6-9

For the first time clay artist, or those of you who have been there, done that, and would like to do it again, this class provides you with a chance to create cups, bowls, flower pots, creature sculptures and even wind chimes in our large, well equipped art studio.

Wildlife Paint and Sculpture

July 26–30 Ages 6-9

Using acrylic paint, and giant boulders of your choice, you will create an animal sculpture for your garden or indoors for your home. Using big and bold rocks, students will learn the art of seeing forms in objects of nature. Together with our instructor, you will look at your collection and decide, "What looks like an eye? A face? A foot?" Then, you will sketch and use acrylic paint to create your sculpture. If you like to learn about animals and draw and paint, then you will enjoy this one-of-a-kind art experience.

Great Big Enormous Whopping Cookie Jars

August 2–13 (2 weeks) Ages 6-9

Using your bare hands, a ton of clay, plaster, glaze, carving tools and some muscle, you'll make a cookie jar in the form of a mammal from any continent. To begin, you'll receive lessons in drawing your beast with anatomical precision. Then you'll pour some plaster to create the initial sculpture. Finally, using porcelain clay, you'll start carving. The result is a life sized animal jar (ok, not really life sized because elephants, giraffes, ostriches and the like might be hard to fit in your kitchen). This is a super messy class: clay, plaster, glaze paint, but the outcome is worth it!

HISTORY

Walk Like an Egyptian

August 9–13 Ages 6-9

Travel back in time 3,000 years to the banks of the Nile and learn about one of history's most fascinating ancient cultures. Create your own Book of the Dead, write your name in hieroglyphs and create a diorama of a burial chamber. Students will also explore pharaohs, pyramids, mummies, Egyptian gods and goddesses and much more!

MATH, SCIENCE & ENGINEERING

Be a "Mathlete"

June 21–25 Ages 6-9

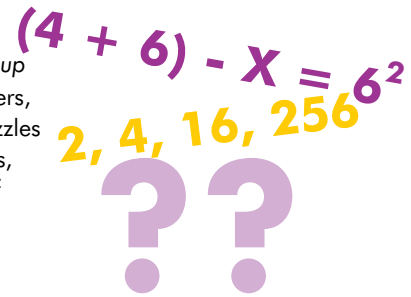

Students who know all of their math facts make fewer computation errors and learn future mathematical operations with ease and speed. This class begins by helping students memorize math facts in all operations through 20 using a fun Math Bee format. We will also use math games like Crypto, Math Maze, Magic Square, The Five Color Puzzle, and Number Puzzle to support test-taking and study skills. This course will teach enough math to help you all year in school!

"Mathletics"

July 26–30 Ages 9 and up

More than just using numbers, math skills are found in puzzles and games too! In this class, we introduce a collection of fantastic math games from all over the world such as Chaos, Knots, and Mazes.

Learn the wonders of fractals and tessellations, metric and Roman numeral calculators, while also mastering tools for math test confidence. Using Google tools, we will make geometry come to life with 3-D models that will help us memorize the formulas essential to success. Whether you already love math, or just want to improve, this is a perfect class for you. Return to school with math on your mind!

Explore the Universe

July 12-16 Ages 6-9

The scientists at the National Aeronautics and Space Administration (NASA) study all aspects of our universe, from the smallest particles of energy to the biggest questions concerning its evolution, size, and structure.

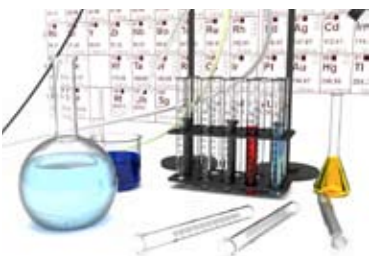

Students in this course use official NASA learning resources to study and analyze the Big Bang, Dark Matter, Black Holes, the life cycle of stars, the planets in other solar systems, and the makeup of galaxies. Using computer technology, we will study and discuss the same images analyzed by the world's greatest astrophysicists to explore the structure, evolution, and destiny of our universe.

Chemical Concoctions

August 2-6 Ages 9 and up

For our budding scientists, this course will introduce seven basic areas in chemistry. Learn the reactions between solids, liquids, and gases; discover the colorful effects of mixing acids and bases; and investigate the properties of metals and salts using electrochemical experiments. This course will explore how far chemistry goes beyond textbooks and laboratories in explaining common and rare occurrences that happen around us every day.

FOOD & COOKING

Baking Breads from Around the World

July 6-9 Ages 6-9

Fresh bread is prized for its taste, aroma, quality and texture. It is also one of the oldest prepared foods dating back to the Neolithic era. How did early man learn to make bread? What cultural and political significance does bread play in the modern day cultures of East Asia, Europe or Africa? In this class students will learn about the history of bread, and will make a variety of breads: leavened bread as white or rye, quick sweet bread as zucchini, and unleavened bread as matzos or tortillas. Along with your breads, you will make an accompanying cookbook to take home with you at the end of the week so that you can continue making bread at home.

All classes take place from 8:00 a.m. to noon, unless otherwise noted. Class sizes are limited. Participation based on child's age in June 2010. Students must be fully toilet trained.

Tasting Tour of Latin America

July 12-16 Ages 9 and up

Latin flavors are among the hottest and most versatile around. In this Spanish immersion class students will explore the rich history of regional Latino foods and culture, its well-earned reputation as healthy cuisine, and how to identify and utilize authentic ingredients. Students will learn how to prepare traditional meals with the benefit of modern techniques.

This hands-on course explores the diversity and variety of cuisines from Puebla and Oaxaca, two regions where Native American and Spanish culinary influences have produced unique dishes. During this virtual culinary tour of Puebla in Central Mexico and Oaxaca in Southern Mexico, students will learn time-honored cooking methods and become familiar with indigenous ingredients, especially a wide variety of chilies. They will learn the rich history, classic preparation techniques, and flavor profiles of authentic Mexican specialties.

LITERATURE

Wonderful Wild Wacky Writing Workshop

July 19-23 Ages 6-9

Are you the next Shel Silverstein or Dr. Seuss? Have you ever written a story with 2 other people? In under 5 minutes? What is an alliteration? How many adverbs can you list? In this class students will learn simple poetry forms and creative writing techniques that will help them during the school year and beyond. Acrostic, limerick, haiku and shape poems as well as short stories and character sketches will be compiled in a book that each student will be proud to take home. The week will culminate in a coffeehouse/cocoa house reading of the children's work, which parents are invited to attend.

Summer Literature Studies

August 9-13 Ages 9 and up

This course is designed for those students interested in reading, discussing, and writing about literature. After reading the assigned novels, students will discuss and write about elements of plot, character development, and even learn to "think" in a character's shoes. Students must supply their own texts for this class.

4th grade: *James and the Giant Peach*, by Ronald Dahl

5th grade: *Island of the Blue Dolphins*, by Theo Robertson

6th grade: *A Series of Unfortunate Events: The Vile Village*, by Lemony Snicket

COMPUTERS

Cyber Safety and Skills That Impress

June 28–July 2 Ages 6-9

When used safely, technology brings students amazing educational opportunities. In this session, we coach students on how to surf the web and use social networking sites appropriately, protect their identities, download and share videos safely, and identify and avoid internet hoaxes and e-mail pranks. They will then learn power skills for boosting presentations and academic papers. This program includes assessments, quizzes, a safety pledge, and a cyber manual that each student will make to take home.

SPORTS & PHYSICAL ACTIVITIES

Wipe Out!

July 12–16 Ages 6-9

Our version of WIPE OUT will feature student contestants divided into teams that try to make their way through tough obstacle courses. Our athletic coaches will begin by training each team to improve their speed, agility, endurance, and strength by practicing each skill and moving you through smaller courses. Then the races will begin! If you love being athletic, and falling into shallow pools of water, getting sprayed with water color paint, crawling through tubes, rolling in sand, jumping over hurdles, balancing, swinging, and running as fast as lightning, then this work out/wipe out class has your name on it!

Beach Volleyball

July 19–23 Ages 9 and up

Learn the unique rules of beach volleyball, practicing on two person teams or teams of six. This class culminates in a true beach volleyball tournament on the sands of Milwaukee's Bradford Beach.

Tchoukball

July 26–30 Ages 6-9

A new game played all over the world, Tchoukball is a fast and complex running and passing game that incorporates the rules of three: take no more than three steps with the ball in your possession, hold the ball no longer than three seconds, and pass the ball to three teammates before you score on the fun instant rebound net. This awesome game builds teamwork and passing skills while getting you running and moving. For more information, visit <http://www.tchoukball.net/game/index.htm>. We guarantee you'll love it!

Hoop It Up

August 2–6 Ages 6-9

The Hoop It Up class is a fundamental basketball program that focuses on teaching beginners the basics including shooting, defense, floor spacing, passing and dribbling. If you love basketball or are getting ready to join a team and want a leg up, then this clinic is perfect for you.

Montessori Classroom Instruction

Ages: 3 to 6

SESSION 1: June 21 to July 16

SESSION 2: July 19 to August 13

Emphasizing a multi-sensory approach to learning, Milwaukee Montessori School teachers develop individually tailored learning plans based on each child's personality, learning pace, and special interests.

In a structured and orderly environment, children receive lessons in reading, writing, mathematics, geography, zoology, and botany, as well as music and art.

Childcare

EARLY MORNING Ages: 3 and Up

(6:45 a.m. to 8:00 a.m.)

Session dates: June 21-August 13

Session cost: \$25 per week if enrolled by May 7 (\$30 per week after May 7); \$20 week of 7/6 (\$25 if enrolled after May 7)

MORNING PLAYGROUP Ages: 3 to 4

MORNING SUMMER SOCIAL Ages: 5 and Up

(8:00 a.m. to noon)

Session dates: June 21-August 13

Session cost: \$95 per week if enrolled by May 7 (\$100 per week after May 7); \$76 week of 7/6 (\$81 if enrolled after May 7)

These sessions offer safe, supervised, age appropriate recreational activities for children.

AFTERNOON PLAYGROUP Ages: 3 to 4

(noon to 6:00 p.m.)

Session dates: June 21-August 13

Session cost: \$110 per week if enrolled by May 7 (\$115 per week after May 7); \$88 week of 7/6 (\$93 if enrolled after May 7)

AFTERNOON SUMMER SOCIAL Ages: 5 and Up

(noon to 6:00 p.m.)

Session dates: June 21-August 13

Session cost: \$120 per week if enrolled by May 7 (\$130 per week after May 7); \$96 week of 7/6 (\$106 if enrolled after May 7)

Children eat lunch together at MMS before setting off for adventures in and around Milwaukee. Children will have an opportunity to swim in one of several local pools every week, take trips to the zoo, local art museums, athletic games and events, and may participate in art, cooking or backyard games here at MMS. Our creative and well-trained staff will have the flexibility to tailor activities to children's interests and to attend community events that arise spontaneously.

All classes take place from 8:00 a.m. to noon, unless otherwise noted. Class sizes are limited. Participation based on child's age in June 2010. Students must be fully toilet trained.

Application

Return registration forms promptly to Milwaukee Montessori School, Attn: Summer Programs, 345 North 95th Street, Milwaukee, WI 53226 with your \$100 deposit. Please submit a separate application for each child. Photocopies of this form are acceptable.

Direct any questions to: mmsadmin@milwaukee-montessori.org
